Hearing protection campaign | **Ready?** *Autumn 2026*

bachmaier® comfort

Ready for home office?

The call's on. So is the chaos.

The siblings are arguing in the hall, the Hoover's running next door, and the parcel delivery driver's ringing the doorbell for the third time. Working from home is brilliant. Most of the time.

Your mic has a mute button. Now your ears do too: with the bespoke bachmaier® comfort ear protectors, you can turn the noise down when you need to focus. For that presentation, that deadline, that one hour of uninterrupted work. And when it really matters, you can take them out in seconds.

Made from soft silicone, custom-made for your ear: no pressure, no slipping, no readjusting. Even during your third meeting of the day, you'll barely notice them. You'll just realise that it's finally quiet.

comfort by bachmaier® – your hearing protection for peace and quiet in your home office.
