Hearing protection campaign | **Ready?** *Autumn 2026*

bachmaier® protect

Ready for precision?

You can't recharge your concentration.

Breathe, aim, pull the trigger. And do this round after round, whether with a handgun or a long gun. Whether in training, competition or service shooting: every shot must hit the mark. To achieve this, you need a clear head and hearing protection that you don't have to keep readjusting.

The bespoke, passive hearing protection bachmaier® protect is individually fitted to your ear. It sits securely in the ear canal, is barely noticeable and stays in place even under a helmet, where it belongs. With long guns, contact with the stock remains unobstructed. No batteries, no charging time.

For the shooting range, we recommend the Impulse filter with an SNR of 28 dB. Made from soft silicone, it remains comfortable to wear even after hours of use.

protect by bachmaier® – your hearing protection for the shooting range. Whether for sport, hunting or professional use.
